Meridian

MERIDIAN BUSINESS SUPPORT
THE RECRUITMENT SPECIALIST

About FluidOne

At FluidOne, we are proud to be an award-winning Connected Cloud Solutions provider that's consistently achieving one of the highest Net Promoter Scores (NPS) in the industry. Our own national fibre network, Platform One, underlies each of our services and is the most connected network in the UK. Our services cover connectivity, SD-WAN, cyber security, IT & cloud managed services, mobile & IoT, UCaaS and CCaaS.

We design tailored solutions to help each of our customers and partners digitally transform their IT and communications. We combine the services of our specialist partners in cyber security, IT managed services, and UC with our unparalleled connectivity to create multi-cloud and multi-connected environments that are secure and safe for them to use.

About Meridian

Founded in 1989, Meridian Business Support is one of the largest independently owned recruitment companies in the UK.

It specialises in permanent placements, temporary positions, executive level roles and interim & contract placements in several market sectors.

An agile platform growth for Meridian, the UK's Best Large Recruitment Business

Meridian is a fast growing business that operates in an ever more competitive marketplace with razor-thin margins. Having worked with the company since 2010, our services and expertise have been critical in keeping them ahead of their competitors.

The Challenge

The firm needed an even better aligned and agile IT infrastructure to help:

- Increase the speed with which they could service customers
- Maintain growth

Downtime was not an option for Meridian, as they provide short notice temporary workers outside of normal working hours. This meant any upgrade work had to be completed without disrupting critical 24/7 access to their IT systems.

The Solution

We migrated the firm's services to our dedicated hosting platform, Reliance. This moved them to a cloud environment offering much higher levels of agility, scalability, risk mitigation and security. By staggering the migration of servers, we kept Meridian working throughout.

We were even able to accommodate a large increase in the project scope during its latter stages and keep to the original schedule.

Result

The firm's new IT infrastructure is even better aligned to helping them grow.

The platform will help them maintain a competitive edge by:

- Enabling them to put more agile processes and systems in place
- Providing the future proofing they need to install the latest technology advancements
